SECRETAIR HOME

The ideal home office desk

Left: secretair home; desk chair on spot cosy | Right: desk get together wood, desk chair on spot cosy, desk chair se:spot, secretair home

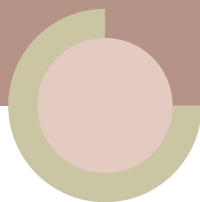

SECRETAIR HOME – THE WORKPLACE FOR ANY TASK

At the office, we have everything we need for work: A desk, swivel chair, and storage space. At the home office, things are usually different – because working at home is different from working at a company office. But no matter where we work, having our own desk is important for any task. This is where secretair home comes in.

No. 1 home office tip: To prevent excessive strain and neck pain, it helps to keep the back straight and the head slightly tilted forward.

SOFT BEING

Soft, rounded, and matt finishes convey an authentic and down-to-earth atmosphere in a homely environment.

FOR GOOD POSTURE IN THE HOME OFFICE

Ergonomic furniture makes all the difference, because sedentary activities in particular require good posture to prevent health problems. Supplemented by a comfortable and good chair, secretair home becomes a practical workplace in the home office.

No. 2 home office tip: Sitting still for too long is not good for the body – getting up every half hour provides movement and stimulates the blood circulation.

SMART BALANCE

Light, smart and filigree – these attributes open up scope for elegance and width.

SPACE SAVER FOR ANY ROOM

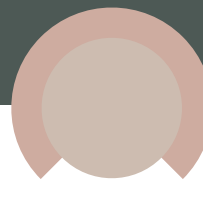

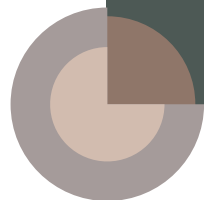

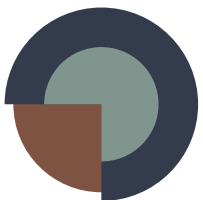

Its convenient size and the storage shelf for utensils make secretair home a real all-rounder. It offers plenty of space for storing documents within easy reach. At the same time, the desk doesn't take up much space in a room or corridor.

No. 3 home office tip: Short breaks are important to stay productive – and they also give your eyes a chance to relax.

URBAN LIVING

Accentuating features and characterful statements turn a room into a powerful place that provides a sense of wellbeing through depth of colour.

SECRETAIR HOME

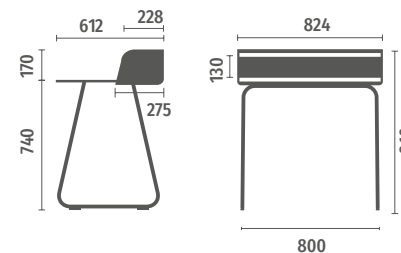

Light design, clear lines, and an organic shape: secretair home stands out due to its modern, uncluttered appearance. Thanks to its compact dimensions, it even fits into small niches. The desk can be easily assembled in just a few steps.

The shelf is integrated into the PET felt frame to accommodate pens, note pads or a calendar.

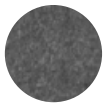

A wireless charger can be optionally installed so that you can charge your smartphone while you are working.
